

BIOBASED PROCESS OIL

The environmental effects of industrial products have been a topic of concern lately. In response, Rovski has produced an environmental friendly, biobased **Process Oil (ROVPRO)**. ROVPRO is produced from sustainable resources & compatible to wide variety of applications.

- Advantages:**
- o Renewable resources
 - o Environmentally friendly product
 - o Low viscosity
 - o Better solubility properties
 - o Reduced processing time
 - o Cost saving

- Application:**
- o Process oil for rubber industry
 - o Process oil for tire processing

ROVSKI – COMPANY PROFILE

Since incorporated in July 1984, Rovski has gained an impressive name in the **sealants and adhesives** industry, supplying to a diversified client portfolio (locally & internationally), including the **automotive, construction, industrial, electronics** and **woodworking industry**. Synergized by a single culture of professionalism, we ensure that our range of products is comprehensive and reliable through **continuous research and development**.

Our success today is realized through the focus on our core capabilities where the product and service innovation and customer-centric business philosophy are combined to give us a leading edge. By pushing the limits in all these areas, Rovski not only aim to be Malaysia's leading supplier in the sealants and adhesives industry, but also as the **raw material supplier**, eg green industrial products for the global market.
